

CYBER CRIME UNIT

Awareness Event

The cyber threat continues to relentlessly increase and, as more and more of us rely on online activities to manage our personal and business requirements, the risk that this presents is greater than ever before. Cyber-crime and fraud comprises a significant percentage all reported crime and criminals continue to devise elaborate and intricate ways of exploiting vulnerabilities meaning that management of cyber security has become a constant requirement. DDoS, phishing and ransomware attacks are on the increase and any such cyber-attack can cause substantial disruption to both individuals and businesses. Data breaches can carry significant financial losses – including fines from the regulator, loss of business data and ultimately irreparable damage to reputation.

However, there are some simple steps that you can take to combat the threat of cyber-attacks. Such steps could reduce your vulnerability by as much as 80%. Join us to see how a sensible approach to personal cyber awareness will inevitably transfer good practice into the workplace. Find out how threats manifest themselves and the actions you can take to mitigate these risks. This event will provide an update on current trends, tactics and considerations for businesses as well as highlighting some useful resources that may support you in your personal approach to cyber security.

Topics Covered:

Social Engineering, Cyber Threats and Trends, Data Breaches, Public Wi-Fi risks, Denial of Service Attacks, Passwords, Phishing, Malware, Backups, Securing Devices, Accreditation.
